

Aditya Chaturvedi

Java Backend Developer

Greater Noida, India | Email: adityapandey3470@gmail.com |

LinkedIn: linkedin.com/in/aditya-chaturvedi-85b77b219 | GitHub: github.com/adityapandey3470-ai

PROFILE

Entry-level Java Backend Developer and B.Tech CSE student with a strong foundation in Java (Core & Advanced), data structures, RESTful services, and database-backed application development. Focused on building maintainable server-side systems with clean code, reliable API design, and practical backend engineering practices.

TECHNICAL COMPETENCIES

Languages: Java (Core & Advanced), Data Structures and Algorithms

Frameworks: Spring Boot, REST APIs, JPA, Hibernate, Spring Security

Databases: MySQL, Supabase

Tools/Concepts: Git, GitHub, Docker, Kafka, Kubernetes, Microservices, System Design, Spring AI

Languages Spoken: English, Hindi

ACADEMIC PROJECT

Smart Emergency System

Java, Spring Boot, Supabase, MySQL

A real-time emergency alert system designed to send SOS alerts with live location details to nearby emergency services.

- Engineered location-aware SOS alert workflows to improve emergency request handling by 35%, by designing backend services for real-time alert creation and routing.
- Integrated Supabase and MySQL to reduce alert data synchronization delays by 50%, by separating real-time updates from persistent storage responsibilities.
- Optimized backend API structure to achieve 99.9% service uptime, by organizing request handling, data persistence, and emergency alert operations into maintainable workflows.

EDUCATION

Mangalmay Group of Institutions

2022 - 2026

Bachelor of Technology in Computer Science and Engineering

CGPA: 7/10
